Senior Frontend Developer / React Native Developer at [Gosu.team](#)

May 2023 - Present about 1 month

Senior Frontend Developer / React Native Developer at PixelPlex

May 2021 - Apr 2022 11 months

Frontend Developer at Epam Systems

Jan 2021 - May 2021 4 months

Frontend Developer at PixelPlex

Feb 2018 - Jan 2021 almost 3 years

Projects

Mobile application for the hypermarket Green

Role:

React Native developer at PixelPlex

Description:

The app provides users with a convenient way to explore the products and services offered by the Green hypermarket. I implemented features such as fast product search, detailed product information, the ability to create shopping lists, and easy online ordering. Additionally, the app includes functionality that allows users to stay updated on promotions and discounts on products, helping them save money while shopping. Together with the team, we aimed to create a user-friendly and intuitive mobile application to ensure maximum comfort for "Hypermarket Green" users

Technologies:

React, React Native, TypeScript, Redux

Tools:

VS Code, Xcode, Android Studio, GitLab, Swagger, Figma

Mars

Role:

Frontend developer at Epam Systems

Description:

Extension and maintenance of the user interface system (Creating new components, supporting multi-theming, updating the codebase)

Technologies:

React, Jest, TypeScript, Storybook

Tools:

VS Code, Azure Dev Tools, Teams, GitHub, Zeplin

FLAK - Multi-Signature Document Flow Management App

Role:

Frontend developer at PixelPlex

Description:

Permissioned blockchain document management platform that enables executives and shareholders to vote and pass resolutions within one web application

Technologies:

React, Next.js, TypeScript, CSS Modules

Tools:

VS Code, Slack, GitLab, Swagger, Figma, Jira

Corporate Website and Blog System for PixelPlex

Role:

Frontend developer at PixelPlex

Participation:

Transferred application from Vue.js to React.js

Used AMP framework for blog pages

Performed base structure of styles and UI components architecture

Performed an adaptation of the service to mobile devices

Integrated accessibility HTML standards

Technologies:

React, Vue, Next.js, TypeScript, CSS Modules

Tools:

WordPress, VS Code, Slack, PageSpeed Insights, GitLab, AMP, Figma, Jira

Echo - Blockchain ecosystem with DeFi-styled bridges

Role:

Frontend developer at PixelPlex

Description:

High-end network for building smart contracts and decentralized applications with EVM support, fast finality consensus mechanism, and inter-blockchain communication protocol

Participation:

Developed desktop crypto wallets: Blip, EchoWallet

Developed Metamask like browser extension crypto wallet - Bridge

Developed Echo Explorer - Echo block explorer with visualizations of current state and transaction history through graphs, charts, and tables

Technologies:

React, ElectronJS, Redux

Tools:

Jira, Slack, Figma, VSCode, GitLab, Swagger

Education

Belarusian State University

Bachelor's degree in the Faculty of Social and Cultural Communications

Cultural Studies (2011 - 2016)
